Sanitized - Approved For Release : CIA-RDP62-00680R000200080004-5

- ORR Cartographic Program for FY 1960
(Estimated)

SECRET

ORR Projects, includes ERA reports, D/GG requests, and Special Support Branch work: Excludes NIS work.

During 1960 requests from ORR components will probably remain the same as in 1959 and will represent approximately 25% of total manhours worked. Of this percentage ERA and D/GG accounted for the bulk of the work.

NIS Projects required 22% of total manhours worked for 1959 and it is estimated approx. same amount of work will be done in '60. This includes State NIS work.

DD/P City Plans: Although DD/P work is a relatively small percentage, 4½%, of total workload, it is anticipated that a sizable increase, possibly double '59, will occur in '60. In addition to the city plan work and part, it is expected that cartographic support of operations and training will be increased.

~~SECRET~~

OCI — The Special Support Branch will continue to support the Weekly and other OCI projects to the same extent as in '59, namely approx. 3~~4~~ 3/4 % of total workload. (note - this is the Division figure and includes OCI handbooks done in Bldg 11). Requirements of OCI for '60 are estimated to be the same as for '59.

ONE - Contributions to NIE reports represented 1.34 % of total manhours worked. A slight increase of requests during '60 may arise from increased organizational efficiency affected by ONE during the past year.

State Department - Work for State, both NIS and non-NIS ~~totaled~~ 4.61 % during fy '59. Because of the close relationship existing between the Office of Geographer and D/GC, it is estimated State requirements ~~for 1960~~ for Non-NIS work will increase approx. 25% in 1960. Non-NIS State work for 1959 amounted to 1.66 % of our total workload.
